

# Startup Process and Planning

Steps to start a business: idea generation, market research, business planning, funding, registration, launch, and growth.

A business plan includes sections such as Executive Summary, Market Analysis, Organization Structure, Product or Service Line, Marketing and Sales, and Financial Projections.

Funding sources include personal savings, family and friends, bank loans, angel investors, venture capital, and crowdfunding.

Legal requirements often involve business registration, licenses, permits, and tax compliance.

Marketing is crucial — entrepreneurs should identify their target audience, craft a unique selling proposition (USP), and use both digital and traditional marketing strategies.
